

# Triad DamGate Hole Punch System

A simple, fast, efficient process to install DamGate holes in your surface irrigation pipe.

- Reduce inventory costs by only stocking surface pipe by pipe size rather than stocking pipe with various gate hole spacing.
- Rental opportunities for producers to field install DamGate holes.
- Available in 20' or 30' (6 or 9 meter) pipe lengths!

## STABILITY RACK

- The pipe stability rack is manufactured using the highest quality structural steel.
- Engineered to fit 6" (160mm), 8" (200mm), 10" (250mm), and 12" (315mm) pipe.
- Industrial grade, plunger type, router provides years of trouble-free service.

## ROUTER CARRIAGE

- Router carriage features double-sealed, double-shielded bearings for long life in even the most rugged environments.

## CAM-LOCK CLAMP

- A cam-lock clamping system on the router carriage insures pipe stability, precise, burr less gate holes, while maintaining absolute DamGate hole alignment.
